A lot of different environmental crimes

- Illegal logging, hunting, pollution, import, building, animal cruelty, etc.
- The environment doesn't care if it is illegal or not

Some general lines and developments

- The penalties have become harder
- Eco-crimes should be prioritized by local police districts

- Not enough capacity at the police
- Many cases are never reported

- Environmental crimes is not an act of affect. General prevention is important

 - By creating measures to favorize more eco-friendly business
